

ELEVENTEN

Systems

Pre-Fabricated Balconies

ElevenTen's balcony systems are designed around each project's specifications, giving you the custom look that seamlessly integrates into the building structure.

Choose standard, glass or cable panel railings and customize from a selection of premium decking materials and railing in any RAL color option.

Decking Material Options

Any Standard RAL Color Option

- ✓ True cantilever design - no tie-back rods required
- ✓ Clean façade with concealed structural support
- ✓ No restrictions on window and door placement
- ✓ No practical balcony length limitations
- ✓ Fully integrated with panelized wall and slab system
- ✓ Pre-coordinated structure eliminates field conflicts
- ✓ Template-based connections for fast installation

Balcony System Details

Balconies shouldn't create coordination problems. ElevenTen's cantilevered, prefabricated system integrates directly into our panelized wall structure, eliminating tie-backs, reducing field conflicts, and accelerating installation. Engineered for performance and built for speed, it provides a clean façade, flexible layout options, and predictable results. Learn more at ElevenTenSystems.com/balcony.
